

Test instruments for level sensors

ME 5

For genuine function checks!
Suitable for all GWG level
sensors, also for zone 0!

Level sensor test instruments with
plug – suitable for all level sensor
fittings.

GPR 4

Sensor test instrument ME 5

Ex-approved level sensor test
instrument with intrinsically safe
sensor circuit for genuine function
checks of all sensors approved
according to TRbF 511, also for
sensors which are installed in
hazardous areas zone 0. All charac-
teristics of the PTC thermistor are
checked via a microprocessor pro-
gram. Test instructions as well as
test results are alphanumerically
displayed. Battery operated.

Sensor test instrument ME 5 P

Level sensor test instrument similar
to ME 5 but with product ID.

Sensor test instrument GPR 4

Simple sensor test instrument suit-
able for use on storage tanks for
fuel oils and diesel fuels. Not per-
mitted for use in hazardous areas
and not for level sensors, which are
installed in tanks containing hazar-
dous media. A signal lamp indi-
cates function or error. Battery-
operated. With GWG connector,
also suitable for GWG with brass
fitting.
