

# Electronic Pressure Measurement

We offer a complete product range  
for industry specific  
applications!

- **Hydraulics and Pneumatics**
- **Plant and Machinery Industry**
- **Chemical Industry**
- **Process Industries**
- **Pharmaceuticals**
- **Food and Drinks Industry**
- **Level Measurement**
- **Signal Processing**

In addition to our comprehensive range of standard products we also provide special customised products to suit your individual requirements.

A large selection of process connections as well as the combination with different pressure transducers provide for optimum adaptation to your specific process.

### Hydraulics, Pneumatics, Plant and Machinery

- Excellent price/quality ratio
- Robust and reliable
- Compact design
- High overload protection
- Customised special units

### Chemical and Process Industries

- Various process connections
- Robust field-mounting housing
- Large selection of construction materials
- High chemical resistance
- Ex-versions for Zone 0 (ATEX)
- Accuracy to 0.1% FSO
- HART-protocol

### Pharmaceutical and Food Industries

- Hygienic process connections
- Hygienic, non-toxic materials and design
- Oil-free ceramic measuring cell
- CIP- and SIP-compatible
- Surface design to 0.25 µm
- High temperature resistance

### Level Indication and Signal Processing

- Submersible or screw-in transducers
- Measuring ranges from 0/40 mbar
- Intelligent versions for universal application
- User-friendly indication and signal processing instruments
- Event reporting systems
